PROFILE

Software Engineer with experience working on the **Sarathi E-Transport system at the National Informatics Centre (NIC)**, with experience in **SQL development, PostgreSQL, reporting, database support, and large-scale data processing**. Focused on Data Engineering with hands-on experience in **Python, SQL, ETL pipelines, PySpark, and data warehousing**, along with project exposure to **Azure Data Factory, Azure Databricks, Azure Synapse, and Apache Airflow**.

TECHNICAL SKILLS

Programming: Python

Databases: SQL, PostgreSQL

Data Engineering: ETL Pipelines, Data Ingestion, Data Transformation, Data Validation, Batch Processing, Data Quality

Data Warehousing: Data Warehousing, Data Modeling

Big Data: PySpark, Apache Spark, Spark SQL, DataFrames, Aggregations, Joins, Window Functions, Partitioning

Cloud & Azure: Azure Fundamentals, Azure Data Factory, Azure Databricks, Azure Synapse

Orchestration: Apache Airflow - Core Concepts, dbt - Core Concepts

Development: Git, Postman, VS Code, React.js, Bootstrap

PROFESSIONAL EXPERIENCE

National Informatics Centre - E-Transport | Hyderabad | July 2025 - Present

Software Engineer

- Developed and maintained SQL queries and reports for the Sarathi E-Transport system used in government transport services.
- Worked with PostgreSQL databases to retrieve, analyze, validate, and support large datasets.
- Monitored data processing operations and database activities supporting application workflows.
- Troubleshooted database queries, reporting issues, and data-related application problems.
- Participated in requirement discussions and documented queries, reports, and data mappings for internal use.

PROJECTS

Data Engineering Workbench - Portfolio Project

- Built a full-stack platform for **data ingestion, ETL, SQL analysis, and pipeline management**.
- Developed modules for **Dashboard, Pipelines, SQL Editor, Projects, Datasets, and Metrics**.
- Implemented FastAPI backend APIs with **PostgreSQL** for data and pipeline operations.

Technologies: Python, SQL, PostgreSQL, FastAPI, React, Pandas

End-to-End ETL Data Pipeline for Analytical Reporting

- Built an ETL pipeline to **extract, validate, transform, and load** data into PostgreSQL.
- Implemented **SQL transformations, data quality checks, and incremental loading**.
- Designed the pipeline for reliable **batch processing and analytical reporting**.

Technologies: Python, SQL, PostgreSQL, Pandas

EDUCATION

CMR Technical Campus — B.Tech, Computer Science Engineering | 2020–2024 | 7.83 CGPA

Sri Chaitanya Junior College, Hyderabad — Intermediate, MPC | 2018–2020 | 93%

Nalanda High School — Secondary School Certificate | 2017–2018 | 9.3 CGPA

CERTIFICATIONS

- **Azure Data Engineering** — Udemy
- **SQL** — Great Learning Academy
- **Python for Data Science** — Great Learning Academy
- **Introduction to Data Analytics** — Simplilearn SkillUp
